

# 8857 M Flat Top

CHAINS > STEEL CHAINS

**Stainless Steel Chain SSE 8857 M K750 - Sideflexing  
With Hardened Pin**

**Article-Nr: P10180107**

## Technical features

|                                |                                                            |
|--------------------------------|------------------------------------------------------------|
| <b>Series</b>                  | 802-805-8157-8857                                          |
| <b>Pitch</b>                   | 38.1 mm                                                    |
| <b>Thickness</b>               | 3.1 mm                                                     |
| <b>Surface Type</b>            | FT - Flat Top                                              |
| <b>Functionality</b>           | Side Flex MAGNETIC                                         |
| <b>Unit of measure</b>         | Meter                                                      |
| <b>Box:</b>                    | 10 ft - 3,048 m                                            |
| <b>Back flex radius:</b>       | 80 mm                                                      |
| <b>Surface finish:</b>         | 0.3 mm                                                     |
| <b>Pin material:</b>           | Martensitic 1,4057                                         |
| <b>Width:</b>                  | K 750 - 190,5 mm                                           |
| <b>Sideflexing radius min:</b> | 750 mm                                                     |
| <b>Material:</b>               | SSE - Specially treated Ferritic Stainless Steel<br>1.4589 |
| <b>Part:</b>                   | P1018                                                      |
| <b>Mass:</b>                   | 5.3 kg/m                                                   |
| <b>Max working load:</b>       | 10000 N                                                    |
